

Brandsafe

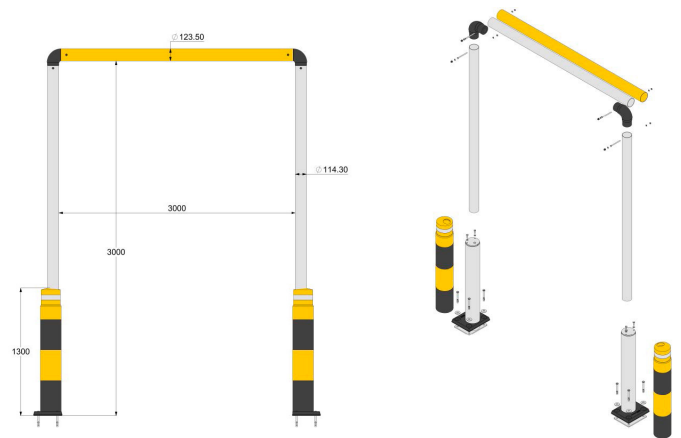

Door Protection Goalpost System

Our **goalpost door protection system** keeps your warehouse protected and damage free. Goalpost installation is quick and simple. Configurable to heights and widths of up to 7 metres means this solution will cope with all door sizes in industrial buildings. The attractive design, easy transport and simple installation keeps cost at the optimum whilst providing robust mezzanine access and door protection.

Features and Benefits

- Modular goalpost with bollard bases, 1200 mm high, fixed with eight M12 x 120 Safety Plus anchors.
- Protect expensive mezzanines and rapid rise/roller doors from damage.
- Used to control height of MHE vehicles passing under mezzanine floors.
- 89 mm diameter uprights.
- 89 mm diameter crossbars and joining spigot connections.
- The goalpost crossbar is available in yellow and black for added hazard awareness.

Modular goalpost system comprising of bollard base units 210 mm diameter with ImpactSAFE buffers, 89 mm diameter uprights, 89mm diameter crossbars and joining spigot connections yellow and black.

Material	Mild Steel / Linear Low-Density Polyethylene (LLDPE) / High-Density Polyethylene (HDPE) / Rubber
Absorption	ImpactSAFE buffer made from natural/SBR rubber
Bollard base	210 mm diameter
Uprights	89 mm diameter
Crossbars	89 mm diameter
Length	Site specific
Width	Site specific
Reflectors	1 no. diamond grade reflective band - silver (50 mm)
Finish	Hot dip galvanised (HDG) BS EN ISO 1461
Colour options	Yellow and black - caution / hazard
