ESSENTIAL

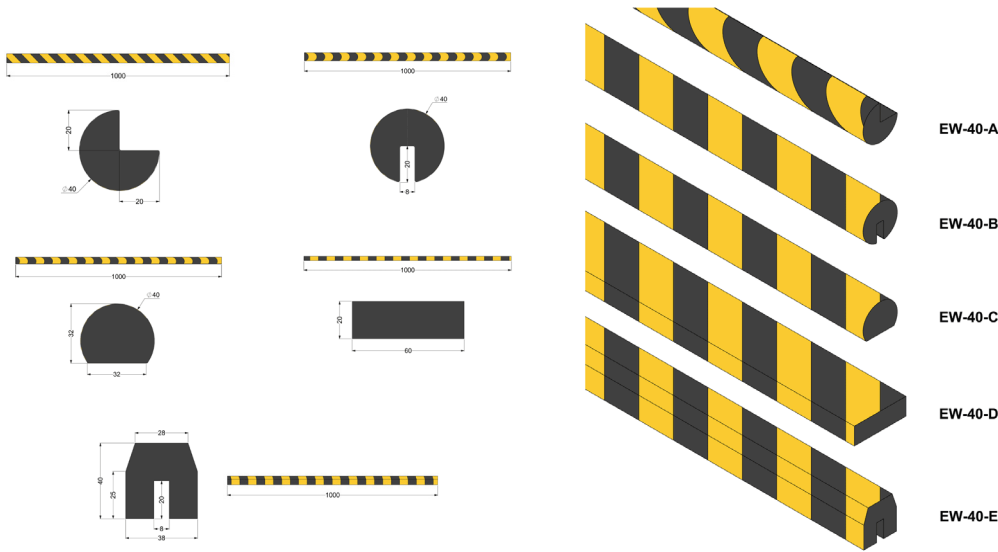

EdgeWRAP

It is necessary to protect personnel from head and limb clashes with sharp and sometimes dangerous steel edges. **EdgeWRAP** is a polyurethane foam self adhesive edge protection that will highlight these hazards and also cushion upon personnel clash/impact. Typically anything below 2100 mm in height in personnel routes will require this protection to mitigate the risk of injury.

Features and Benefits

- Protect pedestrians from injury to heads and limbs, as well as snagging of clothing on sharp steelwork.
- Protect corners from damage.
- Light duty (LD) foam edge and corner protection.
- Quick and easy to install with self adhesive strip.
- Available in 5 shape options .
- Highly visible black and yellow in colour.
- 3 M self-adhesive strips for swift installation (will affix to most surfaces (steel, coated wood etc).
- Supplied in 1 M lengths and can be cut/mitred on site using sharp knife / fine saw.
- Fire tested/approved to DIN 4102 B2.

Material	Polyurethane foam
Length	1000 mm
