

Brandsafe

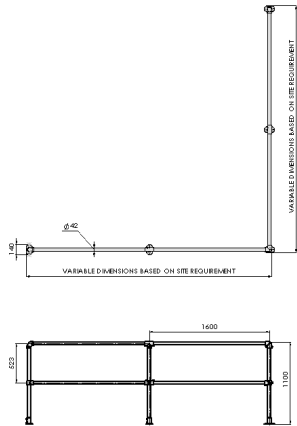

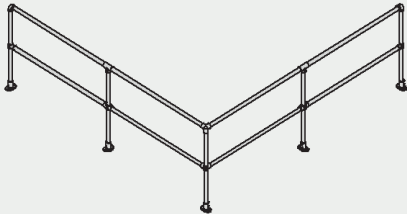

Galvanised Pedestrian Handrail (HR42)

A modular **handrail system** – ideal for creating pedestrian walkways and safe zones to restrict personnel walking under head and limb clash areas such as under conveyor systems. System benefits from steel boots with the option to add a low-level safety barrier fail. Ideal for zoning off LV and IT cabinets to restrict MHE equipment and pedestrian encroachment.

Features and Benefits

- Modular galvanised steel handrail, upright and component system.
- 1100mm high handrail.
- Designed for quick, custom installation.
- Ideal for handrails used on Armco barrier systems.
- Can be cut to length on-site with simple chop-saw cutting process.
- Optional: A yellow and black polymer safety sleeve system (HR50) can make pedestrian routes stand out and enhance the overall look and feel of your facility.

Material	Mild steel
Height	1100mm
Manufactured	UK
Fixings	Supplied in kit form, c/w fixings
Colour options	Galvanised (HR42) / Optional black and yellow sleeve (HR50)
