

Brandsafe

Pedestrian Safety Gate

The Pedestrian Safety Gate provides safe, easy access through any barrier system in environments where pedestrians and MHE operate in close proximity. Manufactured in the UK from linear low-density polyethylene (LLDPE), the gate is lightweight, durable and highly visible. It is ideal for warehouse pedestrian routes, picking aisles and any location where controlled access through a barrier run is required.

Features and Benefits

- Designed to prevent pedestrians from entering forklift and MHE routes and active work areas.
- Lightweight moulded from linear low-density polyethylene (LLDPE) in the UK.
- Variable gate openings – 900mm to 1200mm boxed as a kit c/w sprung return hinges (2 no.) and all required hardware.
- Available in yellow or black.
- Incorporates signage panel and sprung return hinge kit.
- Suitable for use in food production facilities and freezer environments.
- Typical finished height – 1000 / 1100mm.

Material	Linear low-density polyethylene (LLDPE)
Weight	6.5 kg
Temperature range	-40°C to 50°C
Height Options	1000 / 1100mm
Gate Panel Height	600mm
Gate Panel Depth	85mm
Gate Panel Width	1225mm
Variable Gate Opening	900mm to 1200mm
Colour options	Yellow / Black
Components	Pedestrian gate moulding
Accessories	Pedestrian gate sign, pedestrian gate hinge set
