SteelWRAP Column Protection

SteelWRAP Armco Column Protection provides heavy duty, full metal defence for structural columns in demanding warehouse environments. Engineered with curved steel posts and double stacked Armco rails on all four sides, it delivers exceptional strength, impact resistance and long term durability to safeguard critical assets where collisions are frequent.

Features and Benefits

- Heavy duty steel Armco column protection for high risk warehouse and industrial environments.
- Modular design with overall width and length determined by site and column dimensions.
- Replaceable Armco rails allow damaged sections to be swapped out without removing the full system.
- Available in galvanised or powder coated finishes for long term durability in internal or external areas.
- Surface mounted system, securely anchored to the slab for robust, reliable performance.
- Simple and quick to install, no mechanical fixing needed.

Material	Mild Steel
Height	760 mm
Temperature range	-40°C to 90°C
Manufactured	UK
Colour options	Powder coated or galvanised
Floor Anchors	M16 x 150 mm throughbolt
Size options	Width & length dependent on site requirements
